

## Final Project Notes

### Project Description

Let's begin working on the final project. Now, there is a link in the instructor notes that [describes the final project](#) in detail and if you go through it, you will realize that there are three main steps in accomplishing the final project.

The first thing you have to do is come up with an idea or a problem statement for your project. Here, you can choose to enhance any one of the projects that we built in class together or you can choose to work with any one of the modules, or external packages that are available within Python, or you can come up with an original idea for the project, yourself.

The second step is for you to create a solution design. Now, here you will identify all of the steps that will take you to create the final projects. These steps can be in plain and simple English for now.

### Final Project

1. Click on the link in the instructor notes to find out more about the final project.
2. It has information on how to select a project topic, the deliverables and how the project will be assessed.

The final step is for you to

☐

Check this box to indicate that you have read through the Project Description

begin programming, so you can realize your project. By the way, all of these instructions that I am

giving here are also available in the project description document, which is in the instructor notes, so I invite you to go to that document now, please make sure you check this box, to let us know that you've read through the project description.

## Project Rubric

Now I want to highlight one more document that will help you design your final project. It's called the [Project Rubric](#), and is also available in the instructor notes. If you enrolled in the full course experience, you should know that your Udacity coach will use this document to evaluate your project. If you're taking the free courseware, you should still read through this document to figure out what makes a great final project. So I invite you to read through the Project Rubric now, please make sure to check this box after you've read through the Project Rubric.

## Final Project - Rubric

*Check out the rubric document in the instructor notes  
(this document had guidelines that will be used by the Udacity coaches to assess your project)*

## Thank you and Feedback

We've come a long way in this course, and I want to thank you for the time that you've decided to spend with us. Now, before I leave, I want to ask you for your feedback on the course. Tell us what you liked, what you did not like, and the things we can do to improve next time. We look forward to hearing from you.
